Liberal Arts – Business Math Adjunct Instructor

The Columbus College of Art & Design (CCAD) seeks Part-Time Adjunct Instructor[s] to teach Business Math within the Department of Business & Entrepreneurship beginning in the Fall 2016 semester.

Course Details—Business Math
This course is a required first-year course for all students. It explores and reviews basic mathematical skills and knowledge needed to function as a professional artist or designer. Topics covered will include: units and measurement; data analysis, graphical representation and interpretation; fundamentals of algebra and the use of formulas; introduction to probability and statistics; applications to personal finance; and a focus on finding funding within art and design industries. This course makes use of ALEKS, a Web-based, artificially intelligent assessment and learning system that uses adaptive questioning to quickly and accurately determine exactly what a student knows and doesn’t know in a course and what he or she is most ready to learn and master. The role of the adjunct will be to monitor student progress through both the ALEKS course materials and attendance during class meetings, assist students who are struggling with particular topics, support students in understanding the relevance of course materials to their own creative disciplines, and assess student progress and mastery of course materials.

Application Requirements
- Graduate degree in mathematics or business [required]
- Knowledge of the art and design industry—or a willingness to learn about and participate in it [required]
- Openness, collaborative spirit, and willingness to support our students on their educational journeys [required]
- Previous teaching experience [preferred]
- Familiarity with the ALEKS platform [preferred]

About the Business & Entrepreneurship Department
Launched in August of 2014, the Business & Entrepreneurship Department serves in excess of 300 students each year through seven courses. It also provides curricular support to two studio courses that feature embedded business content, and faculty and adjuncts within the department provide 10-12 guest lectures and 3-4 workshops throughout the academic year.

Within the department we follow the Tailored Technical Model of Active Engaged Learning. Our business course materials are built by technical experts in each field, and they are tailored specifically for students of art and design. We also foster active learning environments through all our courses, workshops, and activities.

Our faculty and adjuncts care deeply about the students and work exceptionally hard to support them as they build business, financial, legal, marketing, and entrepreneurial literacy to complement their creative practices and career goals.

About CCAD
CCAD’s campus is a vital and growing “urban learning village” of 1,100 students located in downtown Columbus, a smart, open, and growing city with a metro-area population of 1.4 million. Offering ten undergraduate (BFA) degrees and one graduate (MFA) degree, the College, as a matter of values and practice, focuses on the development of applied creative thinkers. This course can be applied to the business minor.

Please submit a cover letter and resume to:

Columbus College of Art & Design
Attn: Human Resources Department – Business Math
107 N. Ninth Street
Columbus, OH 43215
E mail: humankindsource@ccad.edu [Note “Business Math” in the subject field.]

Resumes will be accepted until filled.

CCAD makes recruitment and retention decisions based on credentials, experience, abilities, talent, and results. CCAD is an EO/EVT/Disability Employer.
